SUMMARY

Motivated and detail-oriented Java Backend Developer with a strong foundation in Core Java, object-oriented programming, and server-side application development. Skilled in building scalable, secure, and modular backend services using Java, Spring Boot, Microservices, and RESTful APIs. Proficient in working with relational and NoSQL databases including MySQL and MongoDB, with hands-on experience in Hibernate/JPA and Spring Data JPA for efficient data access.

Experienced in using Git/GitHub, Maven, Postman, Swagger, and Docker to streamline development, testing, and deployment workflows. Adept at troubleshooting, debugging, and optimizing backend systems for performance and reliability. Passionate about clean code, API design, backend architecture, and continuous learning in fast-evolving development environments, following Agile/Scrum practices.

PROFESSIONAL SKILLS

Java • Spring Boot • Microservices • REST APIs • Spring MVC • Hibernate/JPA • Spring Data JPA • MySQL • MongoDB • Maven • Git/GitHub • Docker • JUnit • Mockito • Swagger • Postman • Agile/Scrum

WORK EXPERIENCE

IOT DEVELOPER (EDUSPHERE SOLUTIONS, PUDUCHERRY)

(oct,2023 - feb,2025)

- Developed and implemented IoT solutions tailored to client needs.
- Designed, coded, tested, and deployed IoT applications.
- Streamlined processes and enhanced overall performance.
- Gained valuable experience in IoT technologies and project execution.
- Contributed to a dynamic organizational setting with innovative solutions.

JUNIOR INSTRUCTOR (NSE TALENTSPRINT PVT.LTD)

(Jun,2023 -Jul,2023)

- Instructed and guided students in the Pega domain with a focus on use-case development.
- Enhanced practical skills through hands-on project-based learning.
- Fostered a collaborative and engaging learning environment.
- Conducted assessments and provided personalized support to students.
- Stayed updated on industry trends to ensure curriculum relevance and effectiveness.

EDUCATION AND CERTIFICATION

BACHELOR OF TECHNOLOGY IN ELECTRICAL AND ELECTRONICS ENGINEERING

(2019 - 2023)

Sri Manakula Vinayagar Engineering College (CGPA: 7.54)

HIGHER SECONDARY CERTIFICATE

(2019)

Amalorpavam Higher Secondary School (70%)

CERTIFIED PEGA SYSTEM ARCHITECT

(2022)

PEGA- UAP Programme

CERTIFIED PEGA SENIOR SYSTEM ARCHITECT

(2023)

PEGA- UAP Programme

PROJECTS USING JAVA AND SQL

1. Student Management System (Spring Boot • REST • MySQL)

Practice Project | Java, Spring Boot, JPA, MySQL, Maven, Postman

Built a Spring Boot-based Student Management System to practice REST API development and CRUD operations.

Highlights:

- Implemented REST APIs for student registration, updating details, and listing students.
- Used Spring Data JPA for ORM and MySQL for data storage.
- Added exception handling using @ControllerAdvice and validation using Hibernate Validator.
- Tested APIs using Postman and wrote basic JUnit test cases.

2. Online Course Registration System (Spring Boot • JPA Relations)

Practice Project | Spring Boot, JPA, REST APIs, MySQL

Developed an upskilling project to understand relational mapping and API design for course enrollment.

Highlights:

- Implemented Many-to-Many mapping between Student and Course entities.
- Created admin APIs for adding courses and student APIs for course selection.
- Performed CRUD using JPA repositories and wrote custom JPQL queries.
- Secured endpoints using simple Spring Security (Basic Auth).

3. Banking Management System (Spring Boot • Transactions)

Practice Project | Java, Spring Boot, JPA, MySQL, Spring Security

Hands-on project to understand transaction management, service layers, and secure endpoints.

Highlights:

- Implemented deposit, withdrawal, balance check, and account creation APIs.
- Used @Transactional for maintaining data consistency.
- Added basic authentication using Spring Security.
- Practiced writing unit tests for transaction calculations using JUnit & Mockito.

4. Grocery Billing System (Inventory + Billing Modules)

Practice Project | Spring Boot, MySQL, REST, Microservices (Conceptual)

Built this project to understand inventory management concepts and modular service design.

Highlights:

- Designed two modules: Inventory Management and Billing Calculation.
- Implemented REST APIs for product CRUD, checking stock, and generating bills.
- Practiced microservice concepts by separating modules logically.
- Wrote utility classes for tax calculation and discount logic.

5. Employee Payroll Management System (Spring Boot • Salary Engine)

Practice Project | Spring Boot, JPA, MySQL, JUnit

Developed a payroll system to practice entity relationships, salary calculations, and API development.

Highlights:

- Built employee CRUD APIs and monthly salary generation logic.
- Implemented PF/ESI/tax calculation as part of the salary engine.
- Stored employee and salary details in MySQL using JPA.
- Wrote test cases for salary calculation modules.
